The Chief Technical Officer,
Snowflake
Phase 1 Site 1.

26th June, 2025

Dear Sir,

AWS CLOUD GROWTH SERVICES APPROVAL

We wish to formally notify you that your project, **Snowflake** submitted to Transnet Cloud following our discussion have been approved by the AWS under the AWS Cloud Growth services. Consequently, the project can now be hosted accordingly.

Considering our proposal to you during our discussion to ensure cost-efficient migration and hosting on the AWS cloud, we have assessed the cost implications for you to migrate these projects to AWS, and wish to put them forward as follows:

- **\$1,500 migration fee (exempted).**
- **AWS Credit:** Receive an instant \$300 AWS credit upon migration. This credit can increase to up to \$10,000 after successful workload setup.
- **Pay for AWS in local currency (Naira):** We will always bill you in Naira and support you in your payment journey, this means the forex fluctuations will not be an issue.
- **Free Workload Setup:** We will assist you with the seamless setup of your workloads on the AWS platform at no cost.
- **Pay-As-You-Go:** AWS is mainly based on the Pay As You Go model. Meaning you only pay for what you've consumed per month. However, based on our assessment, we are seeing a cost estimate of between \$35 - \$50 monthly on AWS for each of the projects.

To ensure a seamless migration, we will require an engagement meeting with you and your CTO or Developer as the case may be, to discuss the modalities for a successful migration. We will need the following information during the meeting:

- The kind of deployment you need
- Where your website is built
- Where your website is currently hosted
- What programming language you used for the Frontend and Backend
- Are you already on cloud and what cloud service you currently use?
- How we can get access to your documents or repo.

Also, it is important to inform you that we respect the privacy of our clients and will NOT request or access any information that is not required for the successful migration and deployment of your website on AWS.

Upon your approval, you will work directly with our AWS trained engineers to ensure a seamless migration to the AWS without service failure.

In order to move forward with the project and ensure smooth collaboration, we kindly request that you provide us with the contact details of your IT Manager /Technical developer /CTO. This will help us align our efforts and address any technical aspects efficiently.

Additionally, please let us know a suitable time duration for a meeting? We would like to ensure we cover all the key points and plan the next steps effectively.

Looking forward to your response and working together.

Thank you.

Blessing Nelson
Project Success Manager

ABOUT US

Transnet Cloud is a trusted AWS Partner, we help organisations optimize their cloud infrastructure for both performance, security and cost-efficiency.

SOLUTIONS AND OFFERINGS

CLOUD-MIGRATION

We simplify and accelerate your journey to the cloud, ensuring seamless migration of applications, data, and workloads to AWS.

MICROSOFT-ON-AWS

Run Microsoft applications seamlessly on AWS - Data Management & Backup: Secure, store, and optimize your critical business data with our comprehensive backup and data management solutions.

AWS-MATURITY-SERVICES

These services focus on helping organizations evolve their cloud capabilities.

CONTENT DELIVERY OPTIMIZATION WITH AMAZON CLOUDFRONT

Improve content delivery speed and reliability with Amazon CloudFront.

AWS OLA ASSESSMENT

We help businesses maximize the value of their AWS investments through OLA assessments.

SECURITY & COMPLIANCE

We prioritize protecting your business data and ensuring compliance with industry standards and regulations.

REAL-TIME API MANAGEMENT THROUGH AMAZON APPSYNCH

Real-time data synchronization for dynamic applications. AWS Professional Service.

CLOUD INFRASTRUCTURE & RESOURCE-MANAGEMENT

Our services ensure your AWS infrastructure operates at peak efficiency.

SERVERLESS COMPUTING VIA AWS LAMBDA

Achieve serverless computing with AWS Lambda, allowing you to run code without provisioning or managing servers.

WHY WORK WITH US

COST OPTIMIZATION

We work with you to optimize your work load on AWS thereby drastically reducing the amount you pay for your cloud infrastructure whether you are already on AWS or you are migrating to AWS from other cloud providers.

SECURE AND ROBUST CLOUD INFRASTRUCTURE

AWS provide the best cloud infrastructure global and offer several solutions. This means that your infrastructure will always be in a secure environment and with availability of several solutions to work with.

INCENTIVES

We provide free Migration from any platform to AWS. Free workload setup on AWS. We provide Instant \$300 AWS credit immediately you sign up with us and it can increase \$10,000 AWS credit after setup.

PAYMENT IN NAIRA

We will always bill you in naira and support you in your payment journey. This means that the forex fluctuations and dollar increase will not directly affect you.

24/7 DEDICATED SUPPORT

We will appoint an account management and support team that will be constantly available to support you and your business meaning you will never be stranded working with us on any issues.
